

Waxing Moon

Full Moon

Waning Moon

New Moon

Astro Count Down Rules

1. Cards are categorized by element: air, earth, water or fire or by modality: cardinal, fixed or mutable. You can place a card that shares element or mutability with the card on the table
2. Specialty Cards are Retrograde (reverse), Full Moon (Skip), Waxing Moon (+2), Waning Moon (+4), and New Moon (change modality/element). To use these cards the player must clear the karma in the game by completing a challenge proposed by the player previous to player trying to use the card
3. In order to win the player must get rid of all their cards, and clear the karma of the game by completing a challenge from the player that went before the “winner”
4. Challenges are arranged by the people playing, but if a player feels uncomfortable to clear the karma of the person previous to them, they can choose to clear another players karma
5. If players do not want to clear karma they can use specialty cards as blanks, but they can no longer skip, add cards, or reverse the order or change the element or modality.

If a player plays “LEO”

They can play another fixed card

Another fire element
